OUR VISION.

- Create a sustainable and healthy environment that balances natural ecology with the needs of the community.
- Create a mindset where environmental issues are always the prime consideration when managing change.
- Continuously advocate for improvements in the planning at all levels of government so that stakeholders subscribe to high levels of ecological and social values.
- Build a strong and respected organization to inform and educate our community about environmental and sustainability issues and, in the process, influence decision-making.

OUR VALUES.

- Respect for Nature: We are part of nature and must live in harmony with it.
- Leadership: We provide positive, effective and educative leadership
- Integrity: We strive for win-win solutions and relationships
- Steadfastness: We stand by our convictions and strive for our goals
- Inclusiveness: We welcome those who share the visions and values of our organization.
